

**Tallahassee-Leon County Comprehensive Plan**

**Land Use Element**

**Policy LU 1.7.7 (Rev. Effective 7/2/99)**

**Suburban Corridor Development Pattern**

**INTENT** - The Suburban Corridor development pattern is intended to accommodate existing development patterns representing a broad range of commercial, light industrial, and office uses which typically serve a regional or subregional population. Office use, and commercial use up to 200,000 square feet per parcel is allowed. Medium density residential use is also appropriate within this development pattern in order to promote a living working environment and make efficient use of infrastructure. It is also intended that community facilities (Recreation, Community Services and Light and Heavy Infrastructure) be allowed. Suburban Corridors are characterized by a linear pattern of single use development along arterial roadways, low floor area ratios and large impervious surface parking areas which are generally larger than the use that they serve. This pattern of development makes inefficient use of infrastructure and has a disproportionate impact upon the environment. Increases in land area zoned for the Suburban Corridor to accommodate a single use development are inconsistent with the Comprehensive Plan, except for increases in areas zoned for Suburban Corridor which permit an allowed use with an existing structure to expand. The intent of this exception is to encourage the continued use of existing structures, rather than the relocation of business to outlying locations. Reusing existing single use sites for multiple use developments, adding new uses to single use sites and/or new multiple use developments in the Suburban Corridor that share parking facilities, have parking structures and/or have high floor area ratios shall be facilitated by Land Development Regulations.

**DENSITY/INTENSITY - Nonresidential**

development shall not have a gross building area exceeding 25,000 square feet per acre. Residential use shall not exceed sixteen dwelling units per acre. Storage areas within buildings, warehouses, mini-warehouses and self storage facilities may have a gross floor area up to 50,000 square feet per acre.

**LOCATION** - Mixed Use A, B and C areas, which already exhibit the type of uses and intensity associated with the Suburban Corridor development pattern may be appropriate to be zoned Suburban Corridor. An increase in the area designated for Suburban Corridor may occur through limited expansion of the existing Suburban Corridors and through the establishment of new Suburban Corridors in Target Planning Areas (TPA) and Critical Planning Areas (CPA). In deciding whether to expand an existing Suburban Corridor, or to create a new suburban corridor in a TPA or CPA, the following criteria shall be considered: Lack of suitably located land which can accommodate the Suburban Corridor development pattern; and Access to arterials with high traffic volumes, surrounded by relatively low density and intensity uses, such as the Residential Preservation Future Land Use Category and Low Density Residential development pattern. Land Development Regulations shall establish access criteria for community facilities to assure their appropriate location. New Suburban Corridors in Target Planning Areas and Critical Planning Areas shall be designed to minimize access impacts upon arterial roadways and shall be designed to be compact rather than linear. Expanding existing or establishing new Suburban Corridors shall require demonstration that more than one land use will be included in the expansion area.

**ACCESS** - Areas zoned for the Suburban Corridor development pattern shall have access to an arterial roadway.
